As planned, the Summer Camp took place at the end of the school year, at the beginning of June 2019. It was a full two days of science-related activities at the Weitzman Institute – a world-renowned science and research institute.

32 girls from all over the country participated.

We received enthusiastic responses about the program from both the girls and the program staff who accompanied them. For a formal evaluation of the program, the participants filled a specially-developed feedback questionnaire, with these results:

**Participants Survey Results**

N=32

- The Institute’s team that facilitated the activities did it interestingly and using advanced technological equipment: Agree Very Much - 31, Moderately Agree - 8, Do Not Agree - 1
- The various science activities broadened my knowledge and made me think of my professional future: Agree Very Much - 29, Moderately Agree - 3, Do Not Agree - 0
- The activities and meetings with researchers from the Institute strengthened my motivation to study hard and develop a career in the sciences: Agree Very Much - 23, Moderately Agree - 8, Do Not Agree - 1
- The lecture by Dr. Efrat Ramati made me think about my future and strengthened my confidence in my ability to develop a challenging career: Agree Very Much - 29, Moderately Agree - 2, Do Not Agree - 1
- The Summer Camp program enabled me to socialize with girls from other schools and discuss with them my educational choices: Agree Very Much - 23, Moderately Agree - 7, Do Not Agree - 2
- Participation in such meetings is significant to my personal development: Agree Very Much - 27, Moderately Agree - 5, Do Not Agree - 0

As can be seen, the participants were all but unanimous in their approval of the program, on all the parameters on which they were surveyed.
