

MATANEL FOUNDATION

ACTIVITY REPORT

Program: Prevention of cervical cancer in underprivileged women living in Israel

Year: 2022

Please present your activity report according to the following lines. The whole rapport will not exceed 2 or 3 pages (as word document).

Name of the program: Prevention of cervical cancer in underprivileged women living in Israel

Year of activity: 2022

Name of the report's writer: Dr. Margalit Lorber

Function of the report's writer: CEO Veahavta

Mail: margalit.lorber@gmail.com Phones: +972502062563

Website / Facebook address of the organization: <https://en.veahavta-clinic.org.il/>

Number of active participants in the program 510

Estimated number of impacted participants: 550

Give the actually state of the program (where the program stands at the date of the activity report, no more than ten lines): The program covered till now more than 500 women, all are status-less and have no medical insurance. Every woman went through a PAP smear (Cytology for cervical cancer screening). So far 22 women were diagnosed with cervical cancer in different degrees of malignancy. Four of them were diagnosed in a very late stage and a major surgery was required.

The main achievements during the last year of activity (main achievements, number of events, number of participants, etc.): The main achievement was the possibility to reach and test over 500 women who did not have any chance to undergo such a medical procedure and the lives of 22 women were saved.

The evaluation (methodology, results, comparisons with the precedent year, conclusions for the future...): The high percentage (4.3%) of cervical cancer in underprivileged women in Israel show and prove the need to continue in this project. As comparison women with medical insurance and Israeli ID have less than 1% prevalence of cervical cancer. The meaning of four-fold malignancy in the underprivileged population take us to plan breast cancer screening as well for the year 2023.

Provisional guide lines for the advancement of the program in the next year: During 2023 we plan to call to VEAHAVTA clinic at least the same number of women, who were never tested or medically checked, to perform cervical cancer screening and breast cancer screening to each of the women.

Please join the Evaluation Report, the Financial Report and the list of the participants to the program (**as PDF documents**)

Please join photos – as **JPG files** – and any link or any other document connected to the program which will seem to you relevant – as **PDF document**.

Please join a 5 minutes movie which presents your institution and the particular project supported by the Matanel Foundation. The movie should be accessible to the philanthropic world and to other potential donors.
